Productive Mailroom Mailing System

The Neopost IJ-80 combines speed, modularity and advanced technology to deliver a mailing solution that's simple and effective. It can be the hub of a sophisticated mailing system, or just a fast, robust franking machine for your mailroom. It handles low-volume mail as easily as high volume runs or mixed daily loads of letters or packages.

With the IJ-80, you can configure a system that fits your mailing profile perfectly. Its modular accessories quickly and easily accommodate your needs as they grow or change - meaning you only pay for the capabilities you need.

The IJ-80 is simple to operate yet durable enough to stand up to the demands of the toughest environments.

Better Mail Management With Advanced Accounting

If you're looking for better control of your mailing expenditure, the IJ-80 makes it simple. Connect it to a PC equipped with Neopost's postage management software so you can track, allocate and analyse your postal costs by department, postal rates and time periods

postal costs by department, postal rates and time periods

Integrates Into Your Mailing System

When linked to a folder inserter, the IJ-80 gives you all the advantages of a complete mailroom solution with continuous, ready to mail processing. It allows your mail to be folded, inserted, sealed, weighed and franked all in one automatic process, and is perfect for mailshots and other marketing activities.

solution with continuous, ready to mail processing. It allows your mail to be folded, inserted, sealed, weighed and franked all in one automatic process, and is perfect for mailshots and other marketing activities.

Versatility at the Heart of Your Mailroom

Maximum Flexibility in Handling Envelopes

The IJ-80 handles envelopes as big as C4, in either portrait or landscape, which can be sealed or not according to your needs. Its high-capacity feeder has an adjustable side guide to hold your large stacks of mail in place, so high-volume, same-sized mailings are dealt with in minutes.

Efficiency at Your Fingertips

The IJ-80 is controlled through a clear, intuitive touch screen that's big enough to read easily and doesn't have you hunting around a tiny keyboard. It's simple for first-time users and fast for experienced operators, giving direct access to important information and one-touch recall of regular jobs.

Get More Impressions for Less

The long lasting ink cartridge reduces operating and supply costs, producing a high volume of impressions per cartridge, and can be conveniently replaced in seconds.

Project a Quality Image

100% inkjet and 100% digital technology gives you sharp, clear printing that enhances the professional look of your organisation. A choice of nine customised slogans can be loaded from memory cards and you can add your company name, greetings, slogans - even logos and photographs.

Modularity That Meets Your Needs as They Evolve

The IJ-80 can interface with integrated weigh platforms or additional scales to automatically calculate and apply correct postage to items weighing up to 30kg.

You can even weigh a selection of items using differential weighing, which calculates the postage for each piece removed from the platform. Neopost's i-Weigh™ dynamic scale checks weight as items of up to 1kg pass to the machine, automatically and accurately adjusting the postal rate. Posting larger items is made easy with the built-in label dispenser or optional thermal roll tape dispenser. You can also add a conveyor-stacker to neatly collect your mail - saving even more time and boosting mailroom productivity.

Specifications	IJ-80
Speed (standard)	Up to 185 envelopes/mn
Speed (dynamic weighing)	Up to 100 envelopes/mn
Envelope minimum-maximum length	127mm - 381mm
