

OMS-200

BY QUADIENT

Get the Best from Your Folder Inserter

Do you need to send a growing number of documents to your customers? Would you like to personalize your communications? Are you looking for a more efficient solution that will make document preparation for your folder inserter much easier? Do you want to ensure important documents reach the intended recipient?

Smart Software for Document Preparation

The OMS-200 software solution simplifies and centralizes the preparation of all your customer communications for our folder inserters. It allows you to:

- **automate the creation of optical marks** on documents before printing (OMR, barcode, 2D)
- **send the right document with the right insert** to the right customer in a fast and cost-efficient way
- **automatically handle mail** with a variable number of pages to save time
- **merge different documents for the same customer** into one envelope to save money on postal costs
- **sort your mail** into different batches

This browser-based solution gives all your employees access to flexible output management software.

Automate

Most organizations send the same type of documents, for example invoices, with the same format to their customers. This involves manually configuring a document each time.

Thanks to OMS-200 you no longer have to worry about spending time on this task as the built-in template mechanism automatically reproduces each step of your document preparation. And once a template has been created it can be applied to any documents uploaded to OMS-200.

Optimize

The OMS-200 merging capability groups documents sharing one single criterion, such as customer ID, into a single communications piece. This ensures customers receive all their documents at once in the same envelope.

OMS-200 also enables you to sort documents, using one single criterion, helping you to optimize postal rates.

Collaborate

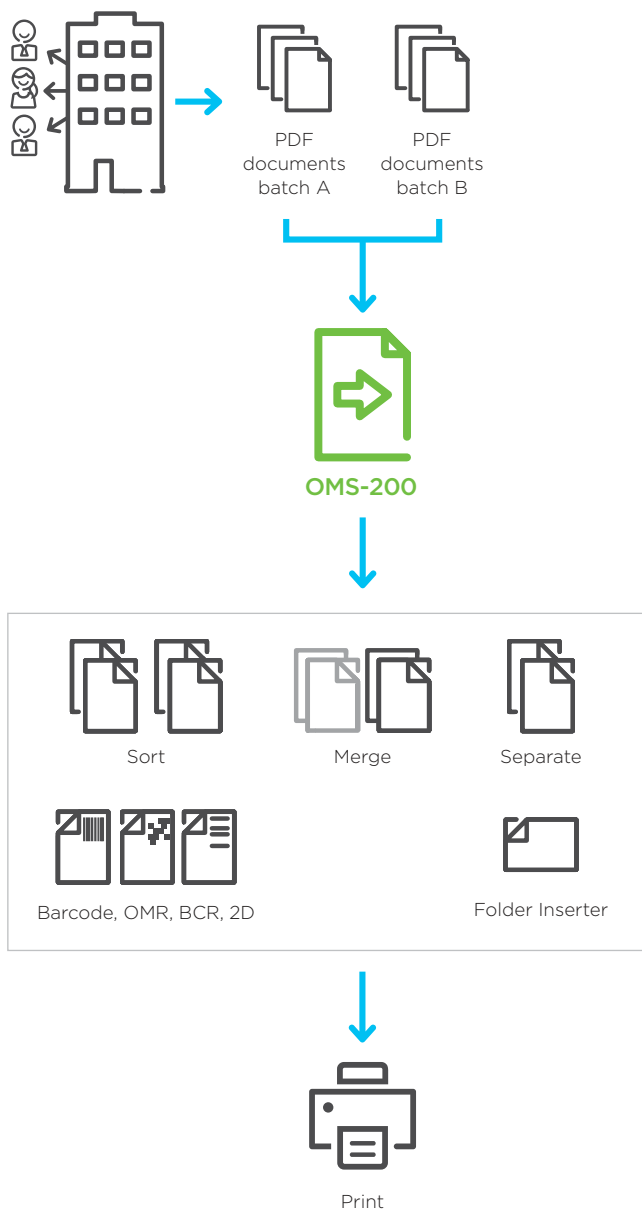

OMS-200 is available to all employees through its browser-based installation. It is simple to set up and easy to use due to its user-friendly interface. Thanks to a centralized installation, OMS-200 can be accessed simultaneously by everyone in your organization. It is compatible with most web browsers and all the functionalities can be made available to any user.

OMS-200: How it Works

Prepare

Getting your documents ready for our folder inserters is easy. It can be handled in just three steps.

1. Separate your documents into different customer communication categories.
2. Define the optical marks (OMR, barcode, 2D) based on the information in the documents.
3. Confirm the output settings in order to get your documents ready for printing and inserting.

Quadient Folder Inserter

OMS-200 is a perfect compliment to Quadient's full range of folder inserters that make it easy for you to create professional, high-quality mailpieces, accommodating a wide range of envelope sizes to automate all your mail processing needs.
