Product description

The compact air purifier AP30 Pro combines clear design with efficient air purification, while causing low noise emissions and low power consumption. The construction of the device ensures a maximum of air throughput and a optimum of filtration. The 360° multi layer filter filters pollutants such as fine dusts (PM2.5 and minor), pollen and acarid allergens, pathogens such as bacteria and mould spores, cigarette smoke, exhaust fumes (also NO₂), chemical vapours (Formaldehyde, Toluol, n-Butane, VOC,...) and odours from the idoor air. The central control panel EASY-TOUCH provides function modes such as automatic mode, Level 1/2/3, Turbo and Nightmode at one`s fingertip. Further features such as a timer function, child lock, filter status or a customization of the automatic mode can be operated via the corresponding APP „IDEAL AIR PRO“. AP30 Pro automatically informs you, when to change the 360° filter. On an average, the 360° filter has to be changed after 12 months, depending on the intensity of the usage.
